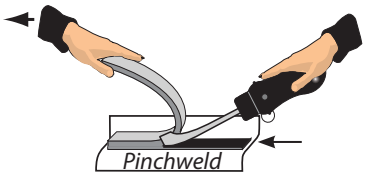
Non-Scratch Pinchweld Trimming Blades

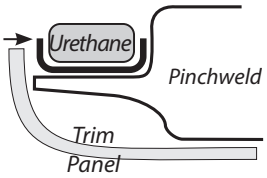
BTB's WK6 range of winged non-scratch Pinchweld Trimming Blades allow easy and safe removal of excess adhesive. They have a special and distinct radius grind cutting edge to the underside, extending up the vertical wing on each side, which avoids any damage to painted pinchwelds, including the vertical pinchweld wall, and which leaves a thin even layer of adhesive on the pinchweld for re-bonding.

- ***Easily re-sharpened***
- ***Superior quality and robust design***
- ***Made to last***

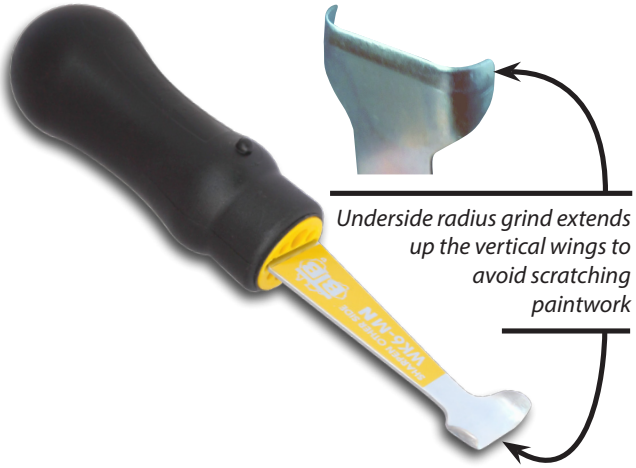
How These Blades Work

A thin even layer of adhesive remains for re-bonding.



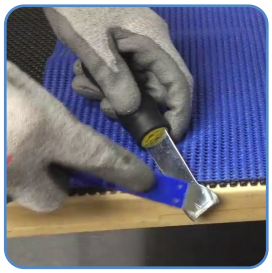


Wings protect pinchweld wall and interior trim and allows adhesive to steer blade



Sharpening BTB WK6 Blades

Visit btbtools.com/videos and click on the WK6 Blade Sharpening link.



BTB Non-Scratch Pinchweld Trimming blades are radius-sharpened underneath. Only re-sharpen the underside using BTB's WK8DSM diamond hone sharpening stone. SHARPEN OTHER SIDE is printed on these blades, leaving the top side/face as a non-bevelled flat sharp edge. De-burr the top flat face after sharpening if needed.

These blades must be efficiently sharp from the tip of one wing across to the other wing tip. When maintained and used correctly, these innovative blades should never scratch paintwork.

Other Applications

WK6 blades are excellent for removing urethane embedded with shattered glass.

Auto Body repairers can use these for body deadener, hemlock and seam seals.

Made to Last!

Keep sharp using BTB's WK8DSM Sharpening Stone

Regular Profile Trimming Blades

Part / Width	Blade Image	Specific Applications
WK6-S 20mm 15mm	 *Regular Profile*	This blade is best suited for trimming narrow beads of bonding adhesive.
WK6-M 28mm 20mm	 *Regular Profile*	This blade covers most pinchweld trimming applications.
WK6-L 34mm 25mm	 *Regular Profile*	This blade is best suited to trimming wider beads bonding adhesive.
WK6-40 40mm	 *Regular Profile*	The **WK6-40** blade is great for trimming wide adhesive beads on buses and trains
✪ *Easily re-sharpened* ✪ *Superior quality and robust design* ✪ *Made to last*		

Regular Profile Trimming Blade Kits

These pinchweld trimming sets cater for ALL of your adhesive trimming requirements.

Part / Width	Blade Image	Kit Contents
WK6-SET 4 Blade Set	 *Regular Profile*	***Blades:*** WK6-S, WK6-M, WK6-L, WK6-40 ***Accessories:*** *WK7, WKKEY*
WK6-KIT 4 Blade Set in Storage Toolbag	 *Regular Profile*	***Blades:*** WK6-S, WK6-M, WK6-L, WK6-40 ***Accessories:*** *WK7, WKKEY*
Blade Lengths: **115mm**		

Narrow Profile Trimming Blades

These narrow profile blades provide better clearance when working up closely against the raised section on vehicle Roof Panels, A-Pillars and Trims/Fittings.

Part / Width	Blade Image	Specific Applications
WK6-SN 20mm 15mm	 *Narrow Profile*	This blade is best suited for trimming narrow beads of bonding adhesive.
WK6-MN 28mm 20mm	 *Narrow Profile*	This blade covers most pinchweld trimming applications.
WK6-LN 34mm 25mm	 *Narrow Profile*	This blade is best suited to trimming wider beads bonding adhesive.
WK6-40N 40mm	 *Narrow Profile*	The **WK6-40N** blade is great for trimming wide adhesive beads on buses and trains
***Blade Lengths:* 115mm**		

Narrow Profile Trimming Blade Kits

These pinchweld trimming sets cater for ALL of your adhesive trimming requirements.

Part / Width	Blade Image	Kit Contents
WK6-N-SET 4 Blade Set	 *Narrow Profile*	***Blades:*** WK6-SN, WK6-MN, WK6-LN, WK6-40N ***Accessories:*** *WK7, WKKEY*
WK6-N-KIT 4 Blade Set in Storage Toolbag	 *Narrow Profile*	***Blades:*** WK6-SN, WK6-MN, WK6-LN, WK6-40N ***Accessories:*** *WK7, WKKEY*
✪ ***Easily re-sharpened*** ✪ ***Superior quality and robust design*** ✪ ***Made to last***		

Flat Pinchweld Trimming Blades

Part / Width	Blade Image	Specific Applications
WK6-20N Width: 20 mm	 *Narrow Profile*	Like the winged blades the flat the **WK6-20N** and **WK6-25N** blades include an underside radius grind. They are good for general trimming applications.
WK6-25N Width: 25 mm	 *Narrow Profile*	
WK6-40 Width: 40 mm	 *Regular Profile*	The **WK6-40** and **WK6-40N** blades are great for trimming wide adhesive beads on buses and trains.
WK6-40N Width: 40 mm	 *Narrow Profile*	
Blade Lengths: ***115mm***		

Long Pinchweld Trimming Blade

Part / Width	Blade Image	Specific Applications
WK6-MXN 	 *Narrow Profile*	These blades provides longer reach and greater clearance.
Blade Length: ***150mm***		

All BTB Blades are designed for use in the BTB E-Tool, Air Tool and Manual Handles.
