# BTB System Features & Benefits

## AUTO GLASS REMOVAL APPLICATIONS

BTB's superior removal tool system is precise, smart, and allows the technician to safely remove adhesive bonded auto glass, using no stress or force.

*Long blades easily **Reach Urethane Below Dashboards***

*Cut from outside vehicle with **Powered Cold Knife Blades***

*Excellent for safely removing **Small & Difficult Glasses***

*Cut from inside vehicle with **Precise Cutting Depth Control***

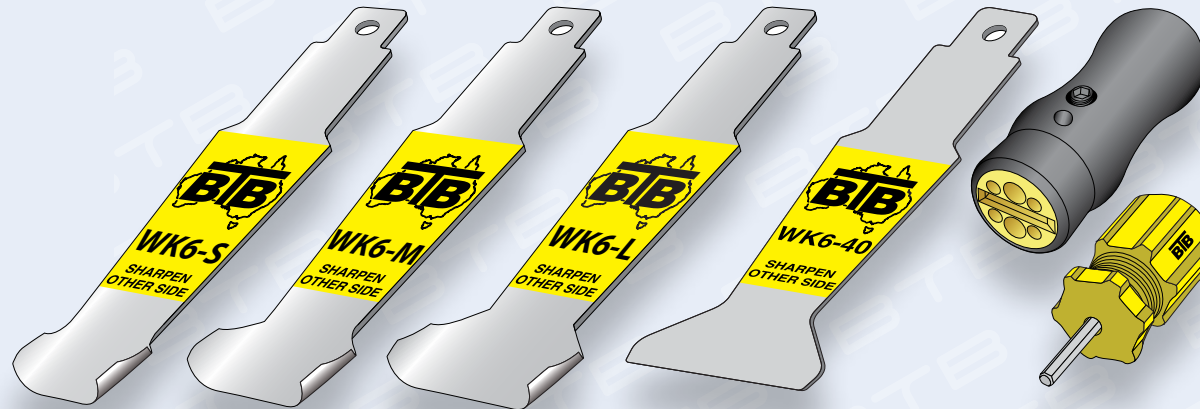

*Safely remove difficult and expensive quarter & hatch glasses and **Panoramic Glass Roof & Frame Assemblies** for re-installation*

# WK6 Non-Scratch Trimming Blades

## NON-SCRATCH PINCHWELD TRIMMING BLADE SET

#WK6-SET

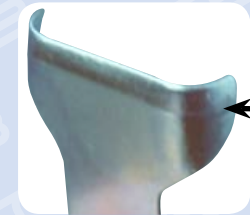

Use in **WK7** or **WK7L** manual handles or in BTB's air or battery power tools.

## WINGED BLADE PROFILES

- » Winged blades eliminate scratching vehicle paintwork, avoiding the time/expense of painting / re-priming due to damage caused using other tools
- » Blades leave a thin, even layer of adhesive on the pinchweld for re-bonding of new glass
- » Great for removing urethane embedded with fragments of shattered tempered glass

Underside radius grind extends up the vertical wings to avoid scratching paintwork

# BTB Professional Tool Kits

**BTB's unique and patented system has been designed to remove all types of adhesive fitted glass and components, without damage to unbroken glass, or paintwork and interior trims.**

*A range of tool kits to suit different industry sector requirements are available. The speciality of the BTB system is automotive glass, including those with encapsulated or bonded mouldings and/or where adhesive is difficult to reach.*
