

SPADE CUTTING BLADES

NEW DESIGN PATENT

Use in BTB's E-Tool, Air Tool or manual handles

Part / Length	Flexible	C / Arm	Blade Image	Applications
WK18Z 140MM	✓	WK11AW / WK11BW5		BTB's new 'spade' blades provide safe and superior control with their 40mm wide blade and cutting edge resting against the glass or panel surface.
WK18Z-S 140MM	✓		 <i>Serrated</i>	
WK19Z 180MM	✓			The WK19 versions are an extra 40mm longer, providing even more reach for hard to get at urethane.
WK19Z-S 180MM	✓		 <i>Serrated</i>	

Windshield/Bonded Auto Glass Removal Applications

The Serrated **WK18Z-S** & **WK19Z-S** blade wide face provides precise stability/control. For many auto glass cut-outs, these Spade Blades offer a user-friendly alternative to BTB's knife-shaped standard "Z" blades. They're also great for separating glass locator pins.

Adhesive Fitted Body Moulds, Emblems, Badges & Decals

The Non-serrated **WK18Z** & **WK19Z** allow quick, simple and damage free **REMOVAL of BODY MOULDS**, bump strips, decals and emblems fitted with adhesive or tape, including thin and delicate nameplates. Their wide, flat and smooth surface slides freely against a painted panel, causing no damage to paint or part.
